

# Aus-Bond Industrial Latex Admix

Specially formulated latex admix for use in sand/cement based mortars for extreme conditions such as swimming pools, facades of buildings, rapid transit stations and areas subject to extra heavy duty traffic. It reduces the porosity of sand/cement mortars, increases the compression strength, bond strength and flexibility to withstand shock and vibration. It will not deteriorate or break down in permanent wet areas.

Available in white

5 and 20 Litres

## Uses

Suitable as an admix to:

- Renders
- Screeds
- Slurry bond coats
- Grout
- Tile adhesives
- Patching mortars

Internal and external use.
