

Aus-Bond Primer, Grout & Mortar Admix

Aus-Bond Primer, Grout and Mortar Latex Admix is a specially formulated, self-crosslinking latex acrylic additive for use as a primer for porous substrates prior to waterproofing, tiling or applying self-levelling mortars. Aus-Bond Primer, Grout and Mortar Latex Admix can be used with cement based tile grouts to reduce water absorption, increase flexibility and help lock in colour. When used with cement based tile adhesives, Aus-Bond Primer, Grout and Mortar Latex Admix increases flexibility, promotes a permanent bond and increases water resistance.

Aus-Bond Primer, Grout and Mortar Latex Admix can also be used as an additive to patching mortars, renders and screeds, as a slurry bond coat when mixed with Portland cement or cement based tile adhesives, and as a primer prior to applying self-levelling mortars or waterproof membranes. Suitable for internal and external use. For best results do not dilute.

Coverage

Coverage per 1L*
4 - 10 m ²

**Coverage of adhesives, screeds and membranes are a guide only as there are other factors to take into account. Large tiles consume more adhesive, rough out of plain surfaces consume more materials. Tiles should always be installed as per Australian Standards and good trade practices. Tile and stone should be fully bedded to provide long term support and durability. Large tile and stone should be back buttered to ensure good bond.*
