Tile Leveling Screw System

The re-usable tile screw levelling system is a tile levelling system that can easily be added after the tiles have been laid and comprises of a threaded cap and clip that can be tightened by hand, or with the included wrench tool.

The tile levelling screw system clips are suitable for use with tiles measuring 3 – 15mm in thickness.

- Ideal to substitute a broken levelling clip, saving you from having to lift the tile.
- Reusable design
- Levelling system used for eliminating lippage during installation of tiles.
- Ideal for walls and floors
- 30 bags x 50 pce
